

### **Output 3- Infinity Chat website**

I made an informational website for infinity chat to bring together the social media and advertising for Infinity Chat. By viewing this website, one can get a feel for what Infinity Chat is about, see the benefits, and then “download” the app.

I think the home, contact, and download pages worked well. I was able to inform while keeping a visual and readable consistency.

For documentation, I am thinking of doing a video mockup and some mockups of screenshots of the pages.
